

EU REACH CABOT CORPORATION CAB-O-SIL® AND CAB-O-SPERSE® PRODUCTS

Surface treated silica products only.

Cabot's surface treated silica products include some grades of CAB-O-SIL® and CAB-O-SPERSE® product line.

The Regulation (EC) No. 1907/2006 of the European Parliament and of the Council of December 18, 2006 on the Registration, Evaluation and Authorization of Chemicals (REACH) requires manufacturers and/or importers of chemicals to register those substances in accordance with the procedures and timelines prescribed within the Regulation. Cabot is committed to continuing to supply our EU customers with our treated CAB-O-SIL® and CAB-O-SPERSE® products. In addition, we are working with our suppliers of raw materials for these products to ensure continuity of supply.

With the Commission Regulation (EU) 2018/1881 of 3 December 2018 amending Regulation (EC) No 1907/2006 as regards Annexes I, III, VI, VII, VIII, IX, X, XI, and XII to address nanoforms of substances, the REACH registration obligations for surface treated nanomaterials have evolved. We confirm that Cabot Corporation has submitted the necessary update prior to January 1st, 2020 deadline.

Registration information

Cabot treated fumed silica products are based on synthetic amorphous silica (SAS). SAS (EINECS #231-545-4, CAS #7631-86-9) meets the definition of "substance" under Article 3 of the above referenced Regulation.

Cabot certifies it has completed the registration required to cover all treated silica produced or imported by Cabot facilities in Europe.

Please refer to Cabot's untreated silica REACH statement available on Cabot's website; it provides information on the uses¹ for which untreated silica have been registered under REACH. **Please accept this statement as certification of registration of the synthetic amorphous silica used in our CAB-O-SIL® and CAB-O-SPERSE® products.**

Only representative (OR) information

In order to cover Cabot's chemically surface treated CAB-O-SIL® and CAB-O-SPERSE® products produced outside the EU and imported into the European Union by Cabot and by the direct importation of our customers, Cabot has appointed an OR.

To be covered by the Cabot OR registration, **the non- EU customers are required to regularly provide the Cabot OR with information as described in the REACH Regulation**, in particular, the name/address of each of their EU customer to be covered by the Cabot OR registration, the tonnage of chemically surface treated CAB-O-SIL® and CAB-O-SPERSE® product(s) imported into the EU and its use(s). These information should be provided using the Cabot Only Representative Information Request Form

¹ Please note some uses are specific to certain commercial grade. Please refer to the application-specific statements

available from our [Only Representative package](#). Should this information not be provided in due time, or should this information not be accurate, Cabot's OR cannot cover the EU importer and the EU importer will remain or become responsible for the compliance of its importation of Cabot's chemically surface treated CAB-O-SIL[®] and CAB-O-SPERSE[®] product(s) under the REACH Regulation.

Substances of very high concern (SVHC) information

The European authorities continue to compile a **provisional list (Candidate List) of SVHC** which should be documented under the REACH Regulation, if present at a concentration greater than 0.1% in a chemical. A new list of SVHC has been published by [ECHA](#) on February 4th, 2026.

To the best of our knowledge, Cabot's chemically surface treated CAB-O-SIL[®] and CAB-O-SPERSE[®] products do not contain any of the substances mentioned on this Candidate List above the threshold concentration.

Safety Data Sheet (SDS) information

According to Article 31.1 of the REACH Regulation, an SDS must be provided for hazardous substances or mixtures. Updated extended SDSs for hazardous substances (i.e., with substance classified according to the Classification, Labeling and Packaging Regulation (CLP) and with exposure scenario and Risk Management measures for all identified uses) must be provided. Cabot has updated its treated silica product SDSs to make them compliant with CLP requirements. Most of treated silica products are not classified according to the European Regulation 1272/2008/EC (CLP), therefore no exposure scenarios have been developed, at the exception of HMDZ-treated fumed silica products for which a CLP Annex I harmonized classification exists. Please note that the 2020/828/EC amendment requires additional information relating to the nanoform(s) of the registered substance, when subject to SDS requirements. Our new SDS contains the registered pertaining boundary composition and the nano-characterizers range covering that boundary composition. The most current version of Cabot's product SDSs can be found on our [website](#).

This information is being provided as of the date hereof. Please visit cabotcorp.com/responsibility for any updates to this information.
