ATHLOS™ CARBON NANOSTRUCTURES (CNS)

**Product highlights**
Our ATHLOS carbon nanostructures (CNS) product line is a family of highly conductive coated, branched and crosslinked carbon nanotube structures.

ATHLOS CNS products have a unique morphology of interlinked nanostructures which differentiates this product line from traditional carbon nanomaterials by delivering a combination of:
- Enhanced conductivity at lower loadings
- Improved EMI shielding effectiveness
- Increased tensile strength
- Enhanced handling for easier processing

**Key applications**
ATHLOS CNS based formulations are suitable for use in applications requiring an optimal balance of high electrical conductivity, enhanced mechanical integrity and good processability.

Market segments utilizing these formulations include:
- Automotive
- Consumer electronics
- Apparel
- Aerospace and Defense
- 3D Printing
- Construction

ATHLOS™ CARBON NANOSTRUCTURES (CNS)

Conductive Performance
Electrical percolation curves for polycarbonate compounds with different conductive carbon additives

Volume resistivity test was performed according to a Cabot internal test method on injection molded polycarbonate compounds.

Product form and logistics
♦ Product form: Pellets
♦ Regional availability: Global
♦ Packaging options: 5 kg drums

For information on product-specific storage conditions, please refer to the applicable Safety Data Sheet (SDS) available from your Cabot representative or at cabotcorp.com.
