

## REGAL<sup>®</sup> 330 Pigment Black

**REGAL 330 carbon black is a low structure specialty black pigment designed to impart very good color strength to lithographic gloss inks.**

**Product Form:** Pellet

### Application Information

#### Lithographic Inks

REGAL 330 pigment black is a high gloss, high strength black suitable for heat set and sheet fed lithographic ink applications. Its higher vehicle demand relative to many other gloss pigment blacks tends to limit its application in highly loaded bases.

#### Liquid Inks

REGAL 330 pigment black is suitable for use in liquid inks requiring low viscosity, high gloss and good jetness. Its gloss and strength characteristics are desirable for high end publication applications as well as for packaging inks on non-porous substrates.

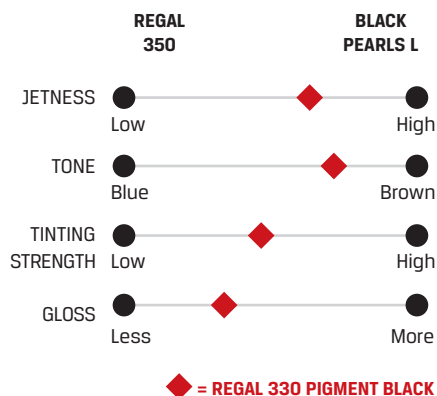

#### Other Applications

REGAL 330 pigment black can be used as a pigment in general dispersions and in dual component electrostatic toners.

The dispersibility of REGAL 330 pigment black depends on the equipment used and the formulation.

REGAL 330 pigment black can be bulk handled. A product with similar morphology, REGAL 330R pigment black, is available in an easier to disperse powdered form.

### PERFORMANCE COMPARISON TO OTHER GLOSS INK PIGMENT BLACKS

# REGAL<sup>®</sup> 330 Pigment Black

## Packaging Options

MULTI UNIT	INTERMEDIATE	BULK
20 kg paper bags	550 kg IBCs	650 kg

## M/SDS
