## K-REACH CHEMICAL POLICY CABOT CHEMICAL PRODUCTS

The Act of Registration, Evaluation, etc. of Chemical Substance in Korea (K-REACH) requires manufacturers and/or importers of chemicals to pre-register/register an existing chemical substance in accordance with the procedures and timelines prescribed within the Act.

Cabot Corporation is committed to continuing supply to our Korean customers with our products. In order to support our customers' K-REACH compliance obligations and to ensure continuity of exports to you, Cabot has appointed an Only Representative (OR) to carry out the pre-registration and registration obligations that fall within the scope of K-REACH Regulation. In accordance with Article 38 of the Act and Article 21 of Enforcement Ordinance, Cabot has appointed **Safe Chemicals Co., Ltd.**, a Chemical Regulatory Consultancy Service Provider established in Korea, to act as Cabot OR.

As of the date of this communication, we certify that Cabot's OR has successfully completed the pre-registration/registration of Cabot chemical substances belonging to the following product groups. These substances are supplied by our company and exported to Korea and are under the scope of K-REACH.

- ◆ Carbon Black
- ◆ Treated and Untreated Fumed Silica
- ◆ Untreated Fumed Alumina
- ◆ Advanced Carbons
- ◆ Aerogel

Other substances contained in Cabot chemical products either do not exceed 1 ton/year import into Korea, or are exempted from pre-registration/registration, or are not requested nor confirmed by our customer with information required by the Act.

To be covered by the Cabot OR service and regarded as a Downstream User (DU) and thus free of obligation to pre-register and register the substance under K-REACH, Korean importers are required to confirm the following information **on an annual basis** for Cabot products that import into Korea, specifically, the name of the **Korean importer(s)** to be covered by the Cabot OR registration, Cabot **products and volume** imported into the Korea and their **use(s)**. As an ongoing obligation under Article 10 of the Enforcement Rules, Cabot DUs must also notify Cabot **immediately** when there is a new importer or a change of importer information (name, legal entity), a change of product use, or higher volume than expected.

Should this information not be provided in due time, or should this information not be accurate, Cabot's OR cannot cover the Korean importer and the Korean importer will remain or become responsible for the compliance of its importation of Cabot products under K-REACH Regulation. Cabot will retain the required records of information regarding products imported by your company from Cabot, and will

ensure, where applicable, that the latest hazard communication (i.e., Safety Data Sheet) on a product is supplied to you.

### Chemical Safety information

According to Article 29 of the Act, an SDS pursuant to Article 41 of the Occupational Safety and Health Act, shall be provided to a hazardous chemical substance or a mixture containing such chemical substance, among phase-in substances not registered during the registration grace period under Article 10 (2), with the relevant information such as registration number, name, hazards, and risk of the relevant chemical substance and information on the safe use thereof.

Cabot will update its hazardous chemical product SDSs to make them compliant with OSHA requirements. The most current version of Cabot's product SDSs can be found on our [website](#).

This information is being provided as of the date hereof. Please contact your sales representative for further information or any updates to it.
